Bryant Delivers Comfort Where

A Tradition of Comfort

Bryant has treated homeowners to higher standards of indoor comfort since 1904. We've earned our reputation through hard work, thoughtful craftsmanship, commitment and dedication. We've applied our years of experience to new thermostats representing the finest the industry has to offer. They combine state-of-the-art technology with the ease of use you've come to expect from Bryant home comfort products.

Ease of Use

The Legacy™ Line thermostats take advantage of today's technology to offer you powerful products that are easy to use. Both models feature one-touch temperature setting options - it doesn't get much easier than that. The programmable model even features Bryant's new Touch 'N' Go™ comfort settings that let you tell the thermostat when you're

home, away, or asleep with the touch of one button. The illuminated display features large, easy-to-view settings, with simple graphics that guide you quickly through any process. And your settings are remembered and protected even when your home loses power - because that's what's easier for you, our valued customer.

Programmable and Non-Programmable Models

The Legacy Line programmable thermostat offers the most popular programming options, giving you the ability to tell your thermostat exactly when to use the comfort settings you want for your home. It takes this popular programming feature one step further, though, by adding the three unique Touch 'N' Go buttons that let you tell your thermostat when you will be home, away, or asleep with the touch of a single button. It's your choice.

Where Few Others Can

Warranty

We provide written warranty protection for every product we offer. These thermostats are protected by a 5-year limited warranty. Extended warranties are also available. Ask your trusted Bryant dealer for details.

Performance

Touch 'N' Go™

The three Touch 'N' Go buttons - home, away, or sleep - let you tell your programmable thermostat where you'll be - and when - so it adjusts your home's temperature accordingly. It's the preferred solution when you want maximum flexibility in your thermostat's programming because it lets you shift from one comfort option - home, away, or sleep - to another with the touch of one button. It's the ideal

Touch·N·Go™

choice for somebody whose schedule varies from day to day or doesn't fit into the four predictable time periods allowed by the thermostat. Establishing the temperature settings for each of the three comfort options is as easy as pressing a few buttons. Link those settings quickly and easily to specific times of the day and you've got the comfort you want, 24 hours a day, no matter what your schedule might bring.

Features

Bryant's Legacy™ Line, our mid-range selection of home comfort solution products, offers some of the most popular thermostat features available to today's homeowners. While the programmable model lets you automatically schedule when the temperature in your home will increase or decrease, the non-programmable model lets you change the temperature quickly and easily with the touch of one button. Both models let you determine if the fan runs automatically as needed or continuously - with just the touch of a button. And large, easy-to-read illuminated displays make checking - or changing - your home comfort settings easier than ever.

Programmable Thermostat Features

*Legacy™ Line Models:
T2-PAC Air Conditioner
T2-PHP Heat Pump*

TOUCH 'N' GO™

The 3 Touch 'N' Go buttons let you tell the thermostat if you're home, away, or asleep with a single touch. Touch 'N' Go offers maximum schedule flexibility for today's busy homeowner.

TIME PERIODS

Set the time range for different time periods according to your schedule's demands so your home is always at the temperature setting you want.

LARGE DISPLAY

An extra large illuminated display makes it easy to see the current indoor temperature and time as well as the on-screen indicators when programming the thermostat or making changes.

AUTO FAN

Set your fan to run only as needed by the system, or to run continuously, to keep air circulating evenly throughout the home.

SMART RECOVERY

Smart Recovery transitions your home from one temperature period to the next so that your home's temperature matches the temperature setting at the start of each time period. It does this in the most energy-efficient manner possible.

AUTO CHANGEOVER

Your thermostat can automatically switch your system from heating to cooling - or from cooling to heating - whenever necessary.

Non-Programmable Thermostat Features

*Legacy™ Line Models:
T2-NAC Air Conditioner
T2-NHP Heat Pump*

ONE BUTTON CHANGES

Changing your temperature settings is as easy as pressing a button.

LARGE DISPLAY

An extra large illuminated display makes it easy to see the current indoor temperatures as well as the on-screen indicators when making changes.

AUTO FAN

Set your fan to run only as needed by the system, or to run continuously, to keep air circulating evenly throughout the home.

AUTO CHANGEOVER

Your thermostat can automatically switch your system from heating to cooling - or from cooling to heating - whenever necessary.
