David, and Mark,

We just wanted to take a moment to tell you how pleased we are with our new Bryant Evolution AC system that you installed for us in May. You told us prior to installation that this system was very quiet and would save us money on our electric bill each month. Well I want to tell you that you were exactly right on both.

With our old 3 ton system we had to keep our thermostat down to 72 to 74 in order to feel some what comfortable in our house. With our new Evolution system we now keep the thermostat on 79 or 80 on the hottest days and it feels as cool if not cooler than our old system. As for the Electric bill, it has been almost \$80. a month less than it was for this time last year. This is even after JEA gave everyone an increase for a fuel adjustment starting in June.

Just last month I was out in my side yard with two friends of mine and we were no more than 4 feet from my outside compressor unit, I asked them to look at the Fan on the top of the unit. It was turning and yet we could not hear the unit running. It is the most quiet system in my entire neighborhood.

Thank you again for our new system and also for a great installation job as well. My wife and I were very impressed with how clean our house and outside yard was when you left. We didn't have to do a thing but sit back and enjoy our nice cool house.

Thank you again.

Charlie and Fran Walch  
Jacksonville, Florida.
